San Pedro Garza Garcia, Mexico, April 25, 2013 - Axtel, S.A.B. de C.V. ("AXTEL" or "the Company"), a leading Mexican fixed-line integrated telecommunications company, announced today its unaudited first quarter results ended March 31, 2013[1].

For additional information, please contact Adrian de los Santos, Investor Relations Officer and Corporate Finance Director at IR@axtel.com.mx

Highlights:

- During the first quarter of 2013, EBITDA and EBITDA margin increased 18% and 570 bps respectively compared to the previous quarter. This was mainly due to lower operating expense levels derived from the productivity initiatives recently implemented.

- During February, AXTEL began making lease payments on the towers it had divested in January. Excluding this expense, EBITDA and EBITDA margin for the first quarter would have been Ps. 720 million and 31.5% respectively—an increase of 25% and 780 bps respectively compared to previous quarter.

- The quality of the revenue mix improved in the first quarter vis-à-vis the fourth quarter, as evidenced by the Gross Profit margin increase from 72.3% to 75.8%, or 350 bps. This trend reflects the increasing proportion of higher value services, which is consistent with AXTEL's strategy.

- During the quarter the Supreme Court resolved certain cases on fixed-to-mobile interconnection rates involving AXTEL, which resulted in no payment obligation or contingency for the Company. Concerning the Telecommunications and Competition Reform Act under review by Congress, AXTEL considers it is a positive initiative as it promotes a more competitive industry environment. This reform improves the prospects of the Company.

Revenues from operations

Revenues from operations totaled Ps. 2,289 million in the first quarter of year 2013 from Ps. 2,503 million for the same period in 2012, a decrease of Ps. 214 million or 9%.

Revenues from operations totaled Ps. 9,976 million in the twelve month period ended March 31, 2013, compared to Ps. 10,677 million in the same period in 2012, a decrease of Ps. 701 million, or 7%.

Sources of Revenues

IMPORTANT DISCLOSURE. Unless otherwise stated, comments in this section exclude revenues generated by our major wholesale customer (see note 9 for further information).

Local services. Local service revenues totaled Ps. 830 million in the first quarter of 2013, compared to Ps. 913 million for same period in 2012, representing a decrease of Ps. 82 million, explained by Ps. 38 million, Ps. 14 million and Ps. 30 million decreases in monthly rents, measured service and cellular revenues, respectively. Despite recording an 11% decline in customers, monthly rents declined only 6% implying a better customer mix. The 24% decrease in measured services is explained by 16% and 10% decreases in billed-traffic volume and prices, respectively. The 18% decrease in cellular revenue is explained by a 5% decline in cellular billed-traffic volume and a 14% decrease in price, resulting from a market trend linked to lower interconnection tariffs. Revenues coming from monthly rents represented 79% of local revenues during the three month period ended March 31, 2013. For the twelve month period ended March 31, 2013, local revenues totaled Ps. 3,521 million, compared to Ps. 3,746 million registered in the same period in 2012, a decrease of Ps. 225 million or 6% mostly explained by Ps. 55, Ps. 57 and Ps. 113 million declines in monthly rents, measured service and cellular revenues respectively.

Long distance services. Revenues totaled Ps. 266 million in the first quarter of 2013, compared to Ps. 267 million for same period in 2012. Billed-traffic volume increased 21%, however revenues remained flat due to an 18% decline in billed-traffic prices. For the twelve month period ended March 31, 2013, long distance revenues totaled Ps. 1,099 million compared to Ps. 1,132 million registered in 2012, a Ps. 33 million, or 3%, decline.

Data & Network. Data and network revenues amounted to Ps. 705 million in the first quarter of 2013, compared to Ps. 683 million in the same period in 2012, a Ps. 22 million increase driven by mass-market, or, "on-demand" internet services revenues, which increased 25% year-over-year. Private lines and dedicated internet revenues declined 6% and 4% respectively. Mass-market, or, "on-demand" internet services, represented 31% of data & network revenues during the quarter. During the twelve month period ended on March 31, 2013, data and network services revenues totaled Ps. 2,810 million from Ps. 2,615 million registered in 2012, an increase of Ps. 195 million, or 7%.

International traffic. In the first quarter of 2013, international traffic revenues totaled Ps. 124 million, a decrease of Ps. 76 million or 38% versus same quarter of previous year, explained by a blended 14% decline in prices and a 28% reduction in volume. In peso terms, the decline was also affected by a 3% appreciation of the Mexican peso vis-à-vis the US dollar. For the twelve month period ended March 31, 2013, revenues from international traffic totaled Ps. 579 million from Ps. 1,177 million in the same period in 2012, a decline of 51% explained by a 8% decline in volume and a 4% decline in prices.

Other services. Quarterly revenues from other services totaled Ps 326 million in the first quarter of 2013, from Ps. 389 million in the same quarter of previous year, a decrease of Ps. 63 million or 16%, mostly explained by a Ps. 60 million decrease in integrated services. For the twelve month period ended March 31, 2013, revenues totaled Ps. 1,785 million from Ps. 1,635 million registered in 2012, an increase of Ps. 150 million, or 9%.

Revenues by segment **(Excludes International Traffic and Major Wholesale Customer)*

Mass Market. Revenues totaled Ps. 884 million in the first quarter of 2013, compared to Ps. 903 million for the same quarter in 2012, a decrease of 2%, mainly due to 10% and 13% decrease in local and long distance revenues, partially compensated by 25% and 17% increases in data and other revenues. For the twelve month period ended March 31, 2013, revenues totaled Ps. 3,664 million, an increase of 3% compared to the same period in 2012, mostly explained by a 39% increase in data revenues.

Enterprise (including Government). Revenues for this segment amounted to Ps. 1,048 million in the three month period ended March 31, 2013, a decrease of 5% versus the same period in 2012. This is explained by decreases of 24% in integrated services and equipment sales and 5% in local revenues, partially mitigated by increases of 11% in long distance revenues and 2% in data revenues. For the twelve month period ended March 31, 2013, revenues increased 3%, from Ps. 4,588 million registered in the twelve month period ended March 31, 2012, to Ps 4,712 million in 2013. This is due to increases of 10% and 5% in other and data revenues respectively, partially offset by a 5% decline in local revenues.

Interconnection, Public Telephony and Carriers. Revenues for this segment declined 20%, from Ps. 245 million in the first quarter 2012 to Ps. 196 million in 2013, mainly due to 35% and 17% decreases in long distance and data revenues. For the twelve month period ended March 31, 2013 revenues reached Ps. 840 million, a decline of 14% compared to the same period in 2012, primarily explained by a 30% and 44% decrease in local and long distance revenues respectively.

Consumption

Local Calls. Local calls excluding our largest wholesale customer totaled 427 million calls in the first quarter of 2013, compared to 441 million calls for same period in 2012, representing a decrease of 3%. Billed local calls decreased 14 million or 16%, while local calls included in commercial offers increased by 1 million. Business and residential customers contributed with 12 million and 2 million calls respectively to the billed local calls decline. Local calls included in commercial offers represented 82% of total calls in the first quarter of 2013. For the twelve month period ended March 31, 2013, local calls totaled 1,804 million excluding our largest wholesale customer, compared to 1,812 million registered in the same period in 2012, a decline of 8 million calls.

Cellular ("Calling Party Pays"). Minutes of use of calls completed to a cellular line excluding our largest wholesale customer amounted to 155 million in the three month period ended March 31, 2013, compared to 159 million in the same period in 2012, a decrease of 2%. Billed cellular minutes decreased 5 million or 5%, while minutes in modules included in a monthly rent increased 2 million minutes or 4%. Billed cellular minutes represented 70% of cellular minutes in the first quarter of 2013, compared to 72% in the year-earlier quarter. For the twelve month period ended March 31, 2013 and excluding our largest wholesale customer, cellular minutes increased 38 million, or 6%, from 627 million registered in the twelve month period ended March 31, 2012, to 665 million in 2013.

Long distance. Excluding our largest wholesale customer, which represents 12% of total volume, outgoing long distance minutes amounted to 552 million for the three month period ended March 31, 2013, from 475 million in the same period in 2012, a 16% increase. This, resulting from a 10% decrease and 23% increase in traffic from residential and business customers, respectively. Billed long distance minutes during the first quarter of 2013 increased 21% compared to the same period in 2012. Domestic long distance minutes represented 96% of total traffic during the quarter. For the twelve month period ended March 31, 2013 and excluding our largest wholesale customer, outgoing long distance minutes amounted 2,100 million, compared to 1,908 million registered in 2012, an increase of 10%, explained by increased traffic from business customers, particularly in billed long distance minutes.

Operating Data

RGUs[8] and Customers. As of March 31, 2013, RGUs (Revenue Generating Units) totaled 1,451 thousand. During the first quarter of 2013, RGU net-disconnections totaled 38 thousand, compared to 29 thousand net-additions in the first quarter of 2012, attributable to a greater number of disconnections from both voice and wireless RGUs, compensated by an increase in video RGUs. As of March 31, 2013, customers totaled 673 thousand, a decline of 87 thousand from the same date in 2012. Total customers declined 37 thousand on a sequential basis.

Voice RGUs (lines in service). As of March 31, 2013, lines in service totaled 957 thousand. During the first quarter of 2013, gross additional lines totaled 40 thousand compared to 69 thousand in the first quarter of 2012. Disconnections in the first quarter of 2013 totaled 79 thousand compared to 68 thousand in the year-earlier quarter. Customers in low-ARPU offers represented the majority of disconnections during the quarter. Lines in service in the first quarter of 2013 decreased 40 thousand, compared to 1 thousand net-additions in the same period of 2012. As of March 31, 2013, residential lines represented 65% of total lines in service.

Broadband RGUs (broadband subscribers). Broadband subscribers increased 3% year-over-year totaling 479 thousand subs as of March 31, 2013. During the first quarter of 2013, broadband subscribers decreased 14 thousand compared to 27 thousand net-additions in the same period of 2012. As of March 31, 2013, WiMAX broadband subs reached 356 thousand, compared to 383 thousand a year ago, while AXTEL X-tremo, or FTTH customers, totaled 109 thousand. The decrease in broadband subscribers is explained by a temporary high level of WiMAX disconnections, which is expected to come to more normal levels in the short term, as new commercial offers and retentions strategies have been implemented. Broadband penetration reached 50% at the end of the first quarter of 2013, compared to 45% a year ago.

Video subscribers. Axtel commercially launched its pay-television service, AXTEL TV, on January 30th, 2013, and as of March 31, 2013, video subscribers had reached 15 thousand. Video subscribers totaled one thousand at the beginning of this quarter.

Line equivalents (E0 equivalents). We offer from 64 kilobytes per second (“KBps”) up to 200 megabytes per second (“MBps”) dedicated data links in all of our thirty-nine existing cities. We account for data links by converting them to E0 equivalents in order to standardize our comparisons versus the industry. As of March 31, 2013, line equivalents totaled 650 thousand, 17% increase.

Cost of Revenues and Operating Expenses

Cost of Revenues. For the three month period ended March 31, 2013, the cost of revenues represented Ps. 554 million, a decrease of Ps. 71 million, compared with the same period of year 2012, mainly explained by decreases of Ps. 68 million in integrated services costs. For the twelve month period ended March 31, 2013, cost of revenues reached Ps. 2,784 million, an increase of Ps. 119 million in comparison with year 2012, mainly due to increases in costs related to equipment sales, partially offset by decreases in fixed-to-mobile and international traffic costs.

Gross Profit. Gross profit is defined as revenues minus cost of revenues. For the first quarter of 2013, the gross profit accounted for Ps. 1,735 million, a decrease of Ps. 143 million compared with the same period in year 2012. The gross profit margin increased from 75.0% to 75.8% year-over-year, influenced by slightly higher enterprise segment gross margin. For the twelve month period ended March 31, 2013, our gross profit totaled Ps. 7,192 million, compared to Ps. 8,012 million recorded in year 2012, a decrease of Ps. 820 million, or 10%.

Operating expenses. In the first quarter of year 2013, operating expenses totaled Ps. 1,063 million, Ps. 56 million or 5% lower than the Ps. 1,119 million recorded in the same period in year 2012, explained by Ps. 73, Ps. 11 and Ps. 12 million decreases in personnel, outsourcing and maintenance expenses, respectively, due to the efficiency initiatives initiated during the fourth-quarter of last year. These reductions were partially offset by the Ps. 48 million increase in rents due to the towers lease expenses of February and March. For the twelve month period ended March 31, 2013, operating expenses totaled Ps. 4,541 million, coming from Ps. 4,506 million in the same period in 2012. Personnel represented 41% of total operating expenses in the twelve month period ended March 31, 2013.

Adjusted EBITDA, D&A and Operating Income

Adjusted EBITDA[(5)]. The Adjusted EBITDA totaled Ps. 672 million for the three month period ended March 31, 2013, compared to Ps. 759 million for the same period in 2012. As a percentage of total revenues, Adjusted EBITDA margin represented 29.4% in the first quarter of 2013, 95 bps lower than the margin recorded in the year-earlier quarter. Excluding the tower lease expense, Adjusted EBITDA in the first quarter would have been Ps. 720 million, representing a 31.5% margin, or 113 bps higher than a year earlier. For the twelve month period ended March 31, 2013, Adjusted EBITDA amounted to Ps. 2,652 million, compared to Ps. 3,506 million in year 2012.

Depreciation and Amortization[(11)]. Depreciation and amortization totaled Ps. 806 million in the three month period ending on March 31, 2013 compared to Ps. 752 million for the same period in year 2012. Depreciation and amortization for the twelve-month period ended March 31, 2013 reached Ps. 3,128 million, from Ps. 3,068 million in the same period in year 2012, an increase of Ps. 60 million.

Operating Income (loss). In the three month period ended March 31, 2013, the Company recorded an operating income of Ps. 2,968 million compared to an operating income of Ps. 9 million registered in the same period in year 2012. The first quarter 2013 result includes Ps. 3,113 million in gains related to the tower sale. For the twelve month period ended March 31, 2013 our operating income reached Ps. 2,425 million when compared to the operating loss of Ps. 8 million in the same period of year 2012, a variation of Ps. 2,433 million mostly explained by the sale of 883 telecommunication sites.

CFR, Indebtedness, Cash, Investments and Derivative Instruments

Comprehensive financial result. Net interest expense for the first quarter 2013 increased Ps. 64 million vis-à-vis the first quarter 2012 due to the Ps. 48 million cancellation of deferred costs related to the prepayment of the syndicated bank facility and Ps. 81 million related to the structuring of the telecommunication towers sale. Without these 2 effects, net interest expense would have been Ps. 195 million. During the first quarter 2013, a 5.3% peso appreciation against the U.S. dollar generated a Ps. 436 million FX gain, compared to an FX gain of Ps. 969 million related to a 9.3% peso appreciation recorded in the first quarter of 2012. Concerning variations in the fair value of financial instruments, these are partially explained by 29% increase and 4% decline in the price of AXTELCPO during the first quarters of 2013 and 2012, respectively, which affected the valuation of AXTEL´s position held in its own stock through the zero-strike-calls instruments. The Ps. 572 million comprehensive financial gain for year ended in March 2013, compared to a Ps. 1,708 million comprehensive financial loss for year ended in March 2012, is mainly explained by a 3% appreciation of the Mexican peso against the U.S. dollar in the 2013 period, compared to a 7% depreciation in the 2012 period.

Debt. At the end of the first quarter of 2013, total debt decreased Ps. 4,156 million in comparison with the same date in 2012, explained by (i) a Ps. 2,901 million net reduction related to the exchange of the senior notes due 2017 and 2019, (ii) a Ps. 786 million decrease in bank debt related to the prepayment of the syndicated bank facility, (iii) a decrease of Ps. 337 million in leases and financial obligations, (iv) a Ps. 149 million decrease in notes issuance and deferred financing costs, and (v) a Ps. 244 million non-cash decrease caused by the 3% appreciation of the Mexican peso.

Cash. As of the end of the first quarter of 2013, our cash and equivalents balance totaled Ps. 824 million, compared to Ps. 526 million a year ago, and Ps. 608 million at the beginning of the quarter. As of the end of the quarter, 67 percent of the cash balance was maintained in dollars, the rest in pesos.

Capital Investments. In the first quarter of 2013, capital investments totaled Ps. 329 million, or $26 million, compared to Ps. 502 million, or $39 million, in the year-earlier quarter. Accumulated for the twelve-month period ended March 31, 2013, capital investments totaled Ps. 1,843 million, or $141 million, compared to Ps. 2,286 million, or $181 million, for the same period ended in 2012.

Other Investments. As of March 31, 2013, the Company maintained an economic position equivalent to 30.4 million AXTELCPOs in ZSC.

Derivative Instruments. The following table summarizes the Company's derivatives position as of March 31, 2013.

	AXTEL receives	**AXTEL pays**	**Other**
Zero-strike Equity Call Option			
Notional			30.4 million AXTELCPO
Value	30.4 million AXTELCPO times CPO's market price	Strike price: ¢1 per CPO	
Settlement			In cash
Expiration Date			July 2013
Valuation			Ps. 114 million

Financial Statements

Information as of March 31, 2013 compared with information as of March 31, 2012

Assets

As of March 31, 2013, total assets sum Ps. 19,099 million compared to Ps. 20,798 million as of March 31, 2012, a decline of Ps. 1,699 million.

Cash and equivalents. As of March 31, 2013, we had cash and cash equivalents of Ps. 824 million compared to Ps. 526 million in the same date of year 2012, an increase of Ps. 299 million or 57%.

Accounts Receivable. As of March 31, 2013, the accounts receivable were Ps. 2,545 million compared with Ps. 2,191 million in the same date of 2012, an increase of Ps. 354 million.

Property, plant and equipment, net. As of March 31, 2013, the net of depreciation value of property, plant and equipment was Ps. 13,565 million compared with Ps. 15,199 million as of March 31, 2012, a decrease of Ps. 1,635 million. The property, plant and equipment without adjusting for the accumulated depreciation, was Ps. 36,189 million and Ps. 34,951 million as of March 31, 2013 and March 31, 2012, respectively. The increase in property, plant and equipment is due to a higher investment during this period.

Liabilities

Total liabilities were Ps. 10,790 million as of March 31, 2013 compared to Ps. 14,671 million as of March 31, 2012, a decrease of Ps. 3,882 million.

Accounts payable & accrued expenses. On March 31, 2013, the accounts payable and accrued expenses were Ps. 2,168 million compared with Ps. 2,102 million on March 31, 2012, an increase of Ps. 66 million.

Stockholders Equity

On March 31, 2013, the stockholders equity of the Company was Ps. 8,309 million compared with Ps. 6,127 million as of March 31, 2012, an increase of Ps. 2,182 million, or 36%. The capital stock remained unchanged at Ps. 6,626 million as of March 31, 2013 and 2012.

Liquidity and Capital Resources

Historically we have relied primarily on vendor financing, the proceeds of the sale of securities, internal cash from operations and the proceeds from bank debt to fund our operations, capital expenditures and working capital requirements. Additionally, and subject to (i) market conditions, (ii) our liquidity position and (iii) contractual obligations, from time to time, we might acquire senior secured and unsecured notes in the open market or in privately negotiated transactions. Although we believe that we would be able to meet our debt service obligations and fund our operating requirements in the future with cash flow from operations, we may seek additional financing with commercial banks or in the capital markets from time to time depending on market conditions and our financial requirements. We will continue to focus on investments in property, systems and infrastructure and working capital management, including the collection of accounts receivable and management of accounts payable.

Cash Flow Statement

For the three-month period ended March 31, 2013 compared with the three-month period ended March 31, 2012

Net resources provided by operating activities were Ps. 237 million for the three-month period ended on March 31, 2013 compared to Ps. 93 million recorded in the same period of year 2012.

Net resources used in investing activities were Ps. 2,835 million for the three-month period ended on March 31, 2013 compared to Ps. (501) million recorded in the same period of year 2012. These flows primarily reflect investments in fixed assets of Ps. (329) million and Ps. (502) million, respectively.

Net resources (used in) provided by financing activities were Ps. (2,876) million and Ps. (555) million for the three-month periods ended on March 31, 2013 and 2012, respectively.

As of March 31, 2013, the ratios of net debt to Adjusted EBITDA and interest coverage of the company were 2.4x and 2.4x, respectively. As March 31, 2012 the ratios of net debt to Adjusted EBITDA and interest coverage, were 3.1x and 3.4x, respectively.

Since the beginning of operations of the Company, AXTEL has invested approximately Ps. 36 billion in infrastructure. The Company expects to do more investments in the future, according to the expansion of the network in other geographical areas of Mexico in order to gain market and to maintain its current infrastructure and network.

Cash Flow Statement

For the twelve months ended March 31, 2013 compared with twelve months ended March 31, 2012

Net resources provided by operating activities were Ps. 2,348 million for the twelve-month period ended on March 31, 2013 compared to Ps. 2,897 million recorded in the same period of year 2012.

Net resources (used in) provided by investing activities were Ps. 1,305 million for the twelve-month period ended on March 31, 2013 compared to Ps. (2,297) million recorded in the same period of year 2012. These flows primarily reflect investments in fixed assets of Ps. (1,843) million and Ps. (2,286) million, respectively.

Net resources (used in) provided by financing activities were Ps. (3,324) million and Ps. (892) million for the twelve-month period ended on March 31, 2013 and 2012, respectively.

Other important information

1) We are presenting financial information based on International Financial Reporting Standards (IFRS) in nominal pesos for the following periods:

- Consolidated income statement information for the three-month periods ending on March 31, 2013, and December 31 and March 31, 2012; and twelve-month period ending on March 31, 2013 and March 31, 2012, and

- Balance sheet information as of March 31, 2013 and 2012; and December 31, 2012.

2) Revenues are derived from:

   i. Local services. We generate revenue by enabling our customers to originate and receive calls within a defined local service area and by providing offers with local calls, calls completed on a cellular line ("calling party pays," or CPP calls) and long distance minutes included in the monthly rent. Customers are charged a flat monthly fee for a variety of commercial offers and in certain offers, a per call fee for local calls ("measured service"), a per minute usage fee for CPP calls and value added services.

   ii. Long distance services. We generate revenues by providing long distance services (domestic and international) for our customers' completed calls from AXTEL lines.

   iii. Data & network. We generate revenues by providing data, Internet access and network services, like virtual private networks and private lines.

   iv. International traffic. We generate revenues terminating international traffic from foreign carriers.

   v. Other services. Include among others, video service revenues, activation fees, customer premises equipment (''CPE'') sales and revenues generated from integrated telecommunications services provided to corporate customers, financial institutions and government entities.

3) Cost of revenues include expenses related to the termination of our customers' cellular and long distance calls in other carriers' networks, as well as expenses related to billing, payment processing, operator services and our leasing of private circuit links.

4) Operating expenses include costs incurred in connection with general and administrative matters which incorporate compensation and benefits, the costs of leasing land related to our operations and costs associated with sales and marketing and the maintenance of our network.

5) Adjusted EBITDA is defined as net income plus interest, taxes, depreciation and amortization, and further adjusted for unusual or non-recurring items. For additional detail on the Adjusted EBITDA Reconciliation, go to AXTEL's web site at www.axtel.com.mx

6) Earnings per CPO are calculated dividing the net income by the average number of Series A and Series B shares outstanding during the period divided by seven. The number of outstanding Series A and Series B shares was 96,636,627 and 8,672,716,596, respectively, as of March 31, 2013.

7) Net Debt to Adjusted EBITDA: The figure comes from dividing the net debt at the end of the period by the respective LTM Adjusted EBITDA.

8) Revenue Generating Unit, or RGU, represents individual service subscriber who generates recurring revenue for the Company. Total RGUs include the sum of all lines in service, broadband service customers and video subscribers.

9) Breakdown of AXTEL's revenues including its major wholesale customer:

Million Pesos	Q1 2013	Q1 2012	Q4 2012	LTM mar-13	LTM mar-12
Local	834	917	880	3,536	3,982
Long Distance	283	303	306	1,217	1,234
Data & Network	708	685	718	2,819	2,624
Int'l. Traffic	124	201	146	579	1,177
Other	340	396	368	1,825	1,659
	2,289	2,503	2,418	9,976	10,677

10) RECAPITALIZATION PLAN

- On January 31, 2013, the Company closed the sale of 883 telecommunications sites to MATC Digital, S. de R.L. de C.V. (MATC) for $249 million, and also agreed to lease space on these telecommunications sites back from MATC for approximately $20 million in annual net lease expense for the Company and for a term ranging from 6 years to 15 years depending on the technology installation at each site.

- Concurrent with the tower sale, the Company exchanged $142 million and $355 million of its existing Senior Unsecured Notes due 2017 and 2019, respectively, for $249 million and $22 million of new Senior Secured Notes and Senior Secured Convertible Notes, respectively, both due in 2020, and a cash payment of $83 million to tendering bondholders.

11) Depreciation and amortization includes depreciation of all communications network and equipment and amortization of pre-operating expenses and cost of spectrum licenses, among others.

12) Subject to market conditions, the Company's liquidity position and its contractual obligations, from time to time, the Company may acquire its senior secured and unsecured notes in the open market or in privately negotiated transactions.

About AXTEL

Axtel is a Mexican telecommunications company with a significant growth in the broadband segment, and one of the leading companies in information and communication technologies solutions in the corporate, financial and government sectors. The Company serves all market segments -corporate, financial, government, wholesale and residential with the most robust offering of integrated communications services in Mexico. Its world-class network consists of different access technologies like fiber optic, fixed wireless access, point to point and point to multipoint links, in order to offer solutions tailored to the needs of its customers.

AXTELCPO trades on the Mexican Stock Exchange since 2005. AXTEL's American Depositary Shares are eligible for trading in The PORTAL Market, a subsidiary of the NASDAQ Stock Market, Inc.

Visit AXTEL's Investor Relations Center on www.axtel.mx

(1) Reporting entity

Axtel, S.A.B. de C.V. ("AXTEL") is a Mexican corporation engaged in operating and/or exploiting a public telecommunication network to provide voice, sound, data, text, and image conducting services, and local, domestic and international long-distance calls. A concession is required to provide these services and carry out the related activities, (see notes 6 (j) and 12). In June 1996, the Company obtained a concession from the Mexican Federal Government to install, operate and exploit public telecommunication networks for an initial period of thirty years. The corporate domicile of the Company located in Blvd. Díaz Ordaz km 3.33 L-1, Colonia Unidad San Pedro, 66215 San Pedro Garza García, Nuevo León, Mexico. Axtel's primary activities are carried out through different operating entities which are its direct or indirect subsidiaries (collectively with Axtel referred to herein as the "Company").

(2) Significant events

On January 31, 2013, the Company completed the sale of 883 sites to MATC Digital telecommunications, S. de RL de CV ("MATC"), a subsidiary of American Tower Corporation, in amount of U.S. 249 million. Additionally, the Company agreed to lease certain spaces at these locations in terms ranging from 6 to 15 years, depending on the type of technology installed at each site, for a net cost of approximately $ 20 million.

Simultaneously, the Company completed the exchange of 142 and 335 million of unsecured notes due in 2017 and 2019, respectively, for 249 and 22 million dollars secured bond and a convertible bond, respectively, both with initial interest rate initial of 7% which will be increased to 9% and due in 2020, plus a cash payment of $ 83 million to participating holders.

Additionally, we performed the full payment of the remaining balance of the syndicated loan, interest and related derivative transactions, totaling approximately $ 88 million.

On January 30, 2013, the Company launched its pay-TV service "AXTEL TV" in Mexico City, Guadalajara and Monterrey.

On January 25, 2013, the Extraordinary General Meeting of Shareholders authorized the issuance of bonds convertible into shares for a maximum amount of 335 million pesos, which may in the future be converted into shares of class B series "I" Share Capital of the Company. Consequently, the issuance of up to 972,814,143 shares, which remain in the treasury of the Company and will be available for the conversion of convertible bonds into shares in the company.

On December 4, 2012, the Extraordinary General Meeting of Shareholders authorized to negotiate, incur or execute financing operations and debt restructuring on terms and conditions that management deems appropriate and in according with current market conditions, and is authorized to grant part or all of the tangible and intangible assets, present and / or future of the Company to ensure the financing and restructuring operations.

In recent quarters of 2012, the Company has experienced declines in revenues and cash flows, affecting its liquidity. This situation is negatively impacting the Company´s investment program, thus slowing the Company´s growth. The Company plans to address this situation is as follow:

- reduce operating expenses, through the implementation of different programs such as restructuring corporate structure and reducing workforce, and the not renewal of certain offices space under operating leases,

- pursuing a liability management plan targeting to reduce current long term debt to achieve a more affordable debt level,
- selling of non-strategic assets, through sale and lease back transactions,
- launching different commercial offers and new products that were in developing stages and are ready to begin its commercial launch in the coming quarters.

In order to implement the strategic plans, the Company is restructuring certain operations.

(3) International Financial Reporting Standards

Beginning January 1, 2012, the Company adopted the International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standard Board (“IASB”) as the regulatory base to prepare and present consolidated financial statements.

(4) Basis of preparation

a) Statement of compliance

The unaudited consolidated financial statements have been prepared in accordance with IAS 34 "Interim Financial Reporting".

The information presented in the unaudited consolidated financial statements of the Company were prepared according to the same accounting policies and methods of calculation as in the annual financial statements for the year ended December 31, 2012.

During the interim period ended March 31, 2013 and the year ended December 31, 2012 there were no corrections of prior period errors and changes in business or economic circumstances that affect the fair value of financial assets and liabilities financial statements of the Company. In addition there were no transactions seasonal or cyclical nature affecting the interim period and comparability.

There were no changes in estimates of amounts reported in prior interim periods of the financial statements.

At the reporting date of these financial statements there are no events after the interim period that have not been reflected in the financial statements for that interim period.

b) Basis of measurement

The information presented in the consolidated financial statements has been prepared on a historical cost basis, except certain financial instruments. The historical cost is generally based on the fair value of the consideration granted in exchange of the related assets.

c) Functional and presentation currency

These consolidated financial statements are presented in mexican pesos, which is the Company’s functional currency. All financial information presented in pesos or “Ps.”, are to Mexican pesos; likewise, references to dollars or U.S. $, or USD are to dollars of the United States of America.

(5) Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements, unless otherwise indicated.

a) Cash and cash equivalents

Cash and cash equivalents consist of short-term investments, highly liquid, readily convertible into cash and are subject to insignificant risk of changes in value, including overnight repurchase agreements and certificates of deposit with an initial term of less than three months.

b) Restricted cash

The Company restricted cash as of December 31, 2012 presented in the consolidated statements of financial position, amounted to $ 10,709, derived from the syndicated loan.

c) Financial assets

Financial assets are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and the intention is to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Financial assets are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets (other than financial assets at fair value through profit or loss) are added to or deducted from the fair value of the financial assets, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets at fair value through profit or loss are recognized immediately in profit or loss.

Financial assets are classified within the following specific categories: “financial assets at fair value with changes through profit or loss,” “investments held to maturity”, “assets available for sale” “loans and accounts payable.” The classification depends on the nature and purpose thereof and is determined upon initial recognition.

Financial assets valued at fair value through profit or loss

Financial assets are classified as at fair value through profit or loss if they are acquired to be sold in a short term. Derivative financial instruments are classified at fair value through profit or loss, unless they are designated as hedging instruments. Financial assets classified at fair value through profit or loss is recognized initially at fair value, and subsequently changes in fair value are recognized in income or loss in the consolidated statement of comprehensive income.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as such or that are not classified in any of the previously mentioned categories and do qualify as held-to-maturity investments. Available-for-sale financial assets represent investments with a quoted price in an active market and can therefore be reliably valued at their fair value. After initial measurement, available-for sale financial assets are valued at their fair value and the unrealized gains or losses are recognized as a separate item in the other comprehensive income in the stockholders’ equity within other comprehensive income. When the available-for-sale financial assets are sold and all of the risks and benefits have been transferred to the buyer, all previous fair value adjustments recognized directly in the other comprehensive income in the stockholders’ equity are reclassified to the consolidated statements of comprehensive income.

Receivables

Trade accounts receivable and other accounts receivable with fixed or determinable payments that are not traded on an active market are classified as “Receivables”. Receivables are valued at amortized cost using the effective interest rate method, less any impairment losses. Interest income is recognized applying the effective interest rate method.

Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and allocating interest income or financial cost over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments (including all fees and basis points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount.

Write-off of financial assets

The Company writes off a financial asset solely where the contractual rights over the financial asset cash flows expire or substantially transfers the risks and benefits inherent to the ownership of the financial asset.

d) Impairment of financial instruments

The Company assesses at each financial reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset and that had a negative impact on the estimated future cash flows that can be reliably estimated. Evidence of impairment may include indications that the debtor or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and when observable data indicate that there is a measurable decrease in the estimated future cash flows.

Financial assets carried at amortized cost

If there is objective evidence of an impairment loss, the amount of the loss is measured as the difference between the book value of the asset and the present value of expected future cash flows (excluding expected future credit losses that have not yet been incurred). The present value of expected future cash flows is discounted at the financial asset’s original effective interest rate. The carrying amount of the asset is then reduced through a provision and the amount of the loss is recognized in the consolidated statement of comprehensive income. The loans and the related provisions are written off when there is no realistic possibility of future recovery and all of the collateral guarantees have been realized or transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases due to an event that occurs after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the provision account. If a future write-off is later recovered, the recovery is credited to the consolidated interim statement of comprehensive income. If there is objective evidence of impairment in financial assets that are individually significant, or collectively for financial assets that are not individually significant, or if the Company determines there to be no objective evidence of impairment for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and they are collectively evaluated for impairment. Assets that are assessed individually for impairment and for which an impairment loss is or continues to be recognized are not included in the collective evaluation of impairment.

Available-for-sale financial instruments

If an available-for-sale asset is impaired, the difference between its cost (net of any principal payment and amortization) and its current fair value, less any impairment loss previously recognized in the consolidated interim statement of comprehensive income, is reclassified from comprehensive income or loss in stockholders' equity to the consolidated statement of comprehensive income. For equity instruments classified as available-for-sale, if there is a significant or prolonged decline in their fair value to below acquisition cost, impairment is recognized directly in the consolidated statement of comprehensive income but subsequent reversals of impairment are not recognized in the consolidated statement of comprehensive income. Reversals of impairment losses on debt instruments are reversed through the consolidated statement of comprehensive income; if the increase in fair value of the instrument can be objectively related to an event occurring after the impairment loss was recognized.

e) Derivative financial instruments

Hedging instruments

The Company recognizes all derivative financial instruments as financial assets and/or liabilities, which are stated at fair value. At the inception of the hedge relationship, the Company documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk. This documentation includes the identification of the derivative financial instrument, the item or transaction being hedged, the nature of the risk to be reduced, and the manner in which its effectiveness to diminish fluctuations in fair value of the primary position or cash flows attributable to the hedged risk will be assessed. The expectation is that the hedge will be highly effective in offsetting changes in fair values or cash flows, which are continually assessed to determine whether they are actually effective throughout the reporting periods to which they have been assigned. Hedges that meet the criteria are recorded as explained in the following paragraphs:

Cash flow hedges

For derivatives that are designated and qualify as cash flow hedges and the effective portion of changes in fair value are recorded as a separate component in stockholders' equity within other comprehensive income and are recorded to the consolidated interim statement of comprehensive income at the settlement date, as part of the sales, cost of sales and financial expenses, as the case may be. The ineffective portion of changes in the fair value of cash flow hedges is recognized in the consolidated statement of comprehensive income of the period.

If the hedging instrument matures or is sold, terminated or exercised without replacement or continuous financing, or if its designation as a hedge is revoked, any cumulative gain or loss recognized directly within other comprehensive income in stockholders' equity from the effective date of the hedge, remains separated from equity until the forecasted transaction occurs when it is recognized in income. When a forecasted transaction is no longer expected to occur, the cumulative gain or loss recognized in stockholders' equity is immediately carried to profit and loss. Derivatives designated as hedges that are effective hedging instruments are classified based on the classification of the underlying. The derivative instrument is divided into a short-term portion and a long-term portion only if a reliable assignation can be performed.

Embedded derivatives

This type of derivatives is valued at fair value and changes in fair value are recognized in the consolidated statement of comprehensive income.

f) Fair value of financial instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs. For financial instruments that are not traded on an active market, the fair value is determined using appropriate valuation techniques. These techniques may include using recent arm's-length market transactions; reference to the current fair value of another financial instrument that is substantially the same; discounted cash flow analysis or other valuation models.

g) Inventories and cost of sales

Inventories are stated at the lower of historical cost or net realizable value. Cost of sales include expenses related to the termination of customers' cellular and long-distance calls in other carriers' networks, as well as expenses related to billing, payment processing, operator services and our leasing of private circuit links.

Net realizable value is the sales price estimated in the ordinary course of operations, less applicable sales expenses.

h) Investments in associates and joint ventures and other equity investments

Investments in associates are those in which significant influence is exercised on their administrative, financial and operating policies.

Such investments are initially valued at acquisition cost, and subsequently, using the equity method, the result thereof is recognized on profit and loss.

Other equity investments in which the Company does not exercise significant influence the investees' capital stock are recorded at cost as their fair value is not reliably determinable.

i) Property, systems and equipment

Property, systems and equipment, including capital leases, and their significant components are initially recorded at acquisition cost and are presented net of the accumulated depreciation and associated impairment losses.

Property, plant and equipment are presented using the cost method foreseen in IAS 16, "Property, Plant and Equipment." Depreciation is calculated using the straight line method based on the value of the assets and their estimated useful life, which is periodically reviewed by the Company's management.

Depreciation

The estimated useful lives of the Company's assets property, systems and equipment are as follows:

	Useful lives
Building	25 years
Computer and electronic equipment	3 years
Transportation equipment	4 years
Furniture and fixtures	10 years
Network equipment	6 to 28 years
Leasehold improvements	5 to 14 years

Leasehold improvements are amortized over the useful life of the improvement or the related contract term, whichever is shorter.

Subsequent costs

The cost of replacing a component of an item of property, systems and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Company, and its cost can be measured reliably. Maintenance and minor repairs, including the cost of replacing minor items not constituting substantial improvements are expensed as incurred and charged mainly to selling and administrative expenses.

Decommissioning and remediation obligations

The Company recognizes a provision for the present value associated with the Company's decommissioning and remediation obligations to remove its telecommunication towers and capitalized the associated cost as a component of the related asset. Adjustments to such obligations resulting from changes in the expected cash flows are added to, or deducted from, the cost of the related asset in the current period, except to the extent that the amount deducted from the cost of the asset shall not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognized immediately in profit or loss.

Borrowing costs

Borrowing costs directly related to the acquisition, construction of production of qualifying assets, which constitute assets that require a substantial period until they are ready for use, are added to the cost of such assets during the construction stage and until commencing their operations and/or exploitation. Yields obtained from the temporary investment of funds from specific loans to be used in qualifying assets are deducted from costs for loans subject to capitalization. All other borrowing costs are recognized in profits and losses during the period in which they were incurred.

j) **Intangibles assets**

The amounts expensed for intangible assets are capitalized when the future economic benefits derived from such investments, can be reliably measured. According to their nature, intangible assets are classified with determinable and indefinite lives. Intangible assets with determinable lives are amortized using the straight line method during the period in which the economic benefits are expected to be obtained. Intangible assets with an indefinite life are not amortized, as it is not feasible to determine the period in which such benefits will be materialized; however, they are subject to annual impairment tests. The price paid in a business combination assigned to intangible assets is determined according to their fair value using the purchase method of accounting. Research and development expenses for new products are recognized in results as incurred.

Telephone concession rights are included in intangible assets and amortized over a period of 20 to 30 years (the initial term of the concession rights).

Intangible assets also include infrastructure costs paid to Telmex / Telnor.

As a consequence of the acquisition of Avantel, the Company identified and recognized the following intangible assets: trade name, customer relationships and concession rights (see note 12).

k) **Impairment of non-financial assets**

The Company reviews carrying amounts of its tangible and intangible assets in order to determine whether there are indicators of impairment. If there is an indicator, the asset recoverable amount is calculated in order to determine, if applicable, the impairment loss. The Company undertakes impairment tests considering asset groups that constitute a cash-generating unit (CGU). Intangible assets with indefinite useful lives are subject to impairment tests at least every year, and when there is an indicator of impairment.

The recoverable amount is the higher of fair value less its disposal cost and value in use. In assessing value in use, estimated future prices of different products are used to determine estimated cash flows, discount rates and perpetuity growth. Estimated future cash flows are discounted to their fair value using a pre-tax discount rate that reflects market conditions and the risks specific to each asset for which estimated future cash flows have not been adjusted.

If the recoverable amount of a CGU is estimated to be less than its carrying amount, the unit's carrying amount is reduced to its recoverable amount. Impairment losses are recognized in the consolidated statement of comprehensive income.

When an impairment loss is subsequently reversed, the CGU's carrying amount increases its estimated revised value, such that the increased carrying amount does not exceed the carrying amount that would have been determined if an impairment loss for such CGU had not been recognized in prior years.

l) Non-current assets held for sale

Non-recurrent assets that are expected to be recovered primarily through sale rather than through continuing use are classified as held for sale. This means that the asset is available for immediate sale and is sale is highly probable. A non-current asset classified as held for sale is measured at the lower of its fair value less cost to sell and its carrying amount. Any impairment loss for write-down of the asset to fair value less costs to sell is recognized in the statement of comprehensive income.

m) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified as financial liabilities at fair value through profit or loss, loans and financial debt, or derivatives designated as hedging instruments in effective hedges, as the case may be. The Company determines the classification of its financial liabilities at the time of their initial recognition. All financial liabilities are initially recognized at their fair value and, for loans and financial debt, fair value includes directly attributable transaction costs.

Financial liabilities include accounts payable to suppliers and other accounts payable, debt and derivative financial instruments.

Financial assets and liabilities are offset and the net amount is shown in the consolidated interim statement of financial position if, and only if, (i) there is currently a legally enforceable right to offset the recognized amounts; and (ii) the intention is to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Subsequent recognition of financial liabilities depends on their classification, as follows:

Financial liabilities at fair value with changes to profit or loss

Financial liabilities measured at fair value through profit or loss include financial liabilities for trading purposes, and financial liabilities measured upon initial recognition at fair value through profit or loss.

This category includes derivative financial instruments traded by the Company and that have not been designated as hedging instruments in hedging relationships.

Separate embedded derivatives are also classified for trading purposes, except they are designated as effective hedging instruments.

Profits or losses on liabilities held for trading purposes are recognized in the consolidated statement of comprehensive income.

The Company has not designated any financial liability upon initial recognition at fair value through profit or loss. The derivative financial instruments that cannot be designated as hedges are recognized at fair value with changes in profit and loss.

Financial debt and interest bearing loans

After their initial recognition, loans and borrowings that bear interest are subsequently measured at their amortized cost using the effective interest rate method. Gains and losses are recognized in profit and loss at the time they are derecognized, as well as through the effective interest rate amortization process.

The amortized cost is computed by taking into consideration any discount or premium on acquisition and the fees and costs that are integral part of the effective interest rate. Effective interest rate amortization is included as part interest expense in the consolidated statement of comprehensive income.

A financial liability is derecognized when the obligation is met, cancelled or expires.

n) Leases

Leases are classified as financial leases when under the terms of the lease, the risks and benefits of the property are substantially transferred to the lessee. All other leases are classified as operating leases.

The Company as a lessee

Assets held under finance leases are initially recognized as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on borrowing costs. Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

o) Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that Company settles an obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimates to settle the present obligation at the end of the period, bearing into account the risks and uncertainties inherent thereto. When a provision is assessed using estimated cash flows to settle the present obligation, its book value represents the present value of such cash flows (when the effect in the time value of money is significant).

p) Employee benefits

Short-term employee benefits

Employee remuneration liabilities are recognized in the consolidated statement of comprehensive income on services rendered according to the salaries and wages that the entity expects to pay at the date of the consolidated statement of financial position, including related contributions payable by the Company. Absences paid for vacations and vacation premiums are recognized in the consolidated statement of comprehensive income in so far as the employees render the services that allow them to enjoy such vacations.

Seniority premiums granted to employees

In accordance with Mexican labor law, the Company provides seniority premium benefits to its employees under certain circumstances. These benefits consist of a one-time payment equivalent to 12 days wages for each year of service (at the employee's most recent salary, but not to exceed twice the legal minimum wage), payable to all employees with 15 or more years of service, as well as to certain employees terminated involuntarily prior to the vesting of their seniority premium benefit.

Costs associated with these benefits are provided for based on actuarial computations using the projected unit credit method.

Termination benefits

The Company provides statutorily mandated termination benefits to its employees terminated under certain circumstances. Such benefits consist of a one-time payment of three months wages plus 20 days wages for each year of service payable upon involuntary termination without just cause.

Termination benefits are recognized when the Company decides to dismiss an employee or when such employee accepts an offer of termination benefits.

q) Statutory employee profit sharing

In conformity with Mexican labor law, the Company must distribute the equivalent of 10% of its annual taxable income as employee statutory profit sharing. This amount is recognized in the consolidated statement of comprehensive income.

r) Income taxes

Current income taxes

The tax currently payable is based on taxable profit for the year, which for companies in Mexico is comprised of the regular income tax (ISR) and the business flat tax (IETU). Taxable profit differs from profit as reported in the consolidated statement of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred income taxes

Deferred income tax is calculated based on management's financial projections according to whether it expects the Company to incur ISR or IETU in the future. The recognition of deferred tax assets and liabilities reflects the tax consequences that the Company expects at the end of the period, to recover or settle the carrying amount of its assets and liabilities.

Deferred income tax is recognized on temporary differences between the book and tax values of assets and liabilities, including tax loss benefits. Deferred tax assets or liabilities are not recognized if temporary differences arise from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences related to with investments in subsidiaries, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Current and deferred tax for the year are recognized in profit or loss, except where they are related to items recognized in the "Other comprehensive income" line item in the stockholders' equity, in which case the current and deferred taxes are recognized in the stockholders' equity.

s) Revenue recognition

The Company's revenues are recognized when earned, as follows:

- *Telephony Services* – Customers are charged a flat monthly fee for basic service, a per-call fee for local calls, a per-minute usage fee for calls completed on a cellular line and domestic and international long distance calls, and a monthly fee for value-added services.
- *Activation* – At the moment of installing the service when the customer has a contract with indefinite life; otherwise is recognized over the average contract life.
- *Equipment* – At the moment of selling the equipment and when the customer acquires the property of the equipment and assumed all risks.
- *Integrated services* – At the moment when the client receives the service.

t) **Earnings per share**

Net earnings per share result from dividing the net earnings for the year by the weighted average of outstanding shares during the fiscal year. To determine the weighted average of the outstanding shares, the shares repurchased by the Company are excluded.

u) **Segments**

Management evaluates the Company's operations as two revenue streams (Mass Market and Business Market), however it is not possible to attribute direct or indirect costs to the individual streams other than selling expenses and as a result has determined that it has only one operating segment.

(6) Critical accounting judgments and key uncertainty sources in estimates

In applying accounting policies, the Company's management use judgments, estimates and assumptions on certain amounts of assets and liabilities in the consolidated financial statements. Actual results may differ from such estimates.

Underlying estimates and assumptions are reviewed regularly.

The critical accounting judgments and key uncertainty sources when applying the estimates performed as of the date of the consolidated financial statements, and that have a significant risk of resulting in an adjustment to the book values of the assets and liabilities during the following financial period are as follows:

a) Useful lives of property, systems, and equipment - The Company reviews the estimated useful life of property, systems and equipment at the end of each annual period. The degree of uncertainty related to the estimated useful lives is related to the changes in market and the use of assets for production volumes and technological development.

b) Impairment of non-financial assets - When testing assets for impairment, the Company requires estimating the value in use assigned to property, systems and equipment, and cash generating units. The calculation of value in use requires the Company to determine future cash flows generated by cash generating units and an appropriate discount rate to calculate the present value thereof. The Company uses cash inflow projections using estimated market conditions, determination of future prices of products and volumes of production and sale. Similarly, for discount rate and perpetuity growth purposes, the Company uses market risk premium indicators and long-term growth expectations of markets where the Company operates.

c) Allowance for doubtful accounts - The Company uses estimates to determine the allowance for doubtful accounts. The factors that the Company considers to estimate doubtful accounts are mainly the customer's financial situation risk, unsecured accounts, and considerable delays in collection according to the credit limits established.

d) Contingencies - The Company is subject to contingent transactions or events on which it uses professional judgment in the development of estimates of occurrence probability. The factors considered in these estimates are the current legal situation as of the date of the estimate, and the external legal advisors' opinion.

e) Decommission and remediation provision - The Company recognizes a provision for the present value associated with the Company's decommissioning and remediation obligations to remove its telecommunication towers and capitalizes the associated cost as a component of the related asset.

f) Deferred income taxes - The Company prepares future cash flows projections to determine whether it will pay ISR or IETU in future periods, in order to estimate the reversal dates for the temporary differences that result in deferred tax assets and liabilities.

g) Deferred tax assets - Deferred tax assets are recognized for the tax loss carry forwards to the extent management believes it is recoverable through the generation of future taxable income to which it can be applied.

h) Financial instruments recognized at fair value - In cases where fair value of financial assets and liabilities recorded in the consolidated financial statement do not arise from active markets, their fair values are determined using assessment techniques, including the discounted cash flows model. Where possible, the data these models are supplied with are taken from observable markets, otherwise a degree of discretionary judgment is required to determine fair values. These judgments include data such as liquidity risk, credit risk and volatility. Changes in the assumptions related to these factors may affect the amounts of fair values advised for financial instruments.

i) Leases - Lases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

(7) Property, systems and equipment

Property, systems and equipment are as follows:

	Land and Building	**Computer and electronic equipment**	**Transport-ation equipment**	**Furnitur e and fixtures**	**Network equipment**	**Leasehold improvements**	**Constructio n in progress**	**Total**
Balance as of January 1, 2012	430,990	3,040,278	378,071	215,919	27,424,110	417,957	2,536,711	34,444,036

Construction in progress mainly includes network equipment, and capitalization period is approximately six months.

Non-current assets held for sale

Certain of the Company´s communications towers are presented as held for sale due to a formal plan to sell these assets. The sale took place on January 31, 2013. As of December 31, 2012 assets held for sale amounted to $460,462 less liabilities (decommissioning and remediation obligations) of $281,808.

(8) Transactions and balances with related parties

The transactions with related parties during the three-month periods ended March 31, 2013 and 2012 are as follows:

		2012	2011
Banamex:			
Telecommunication service revenues	Ps	140,707	124,057
Commission and administrative services		4,546	3,597
Interest expense		17,204	13,936
Other related parties:			
Rent expense		8,240	10,868
Installation service expense		7,731	7,968
Other		183	1,677

The balances with related parties as of March 31, 2013 and December 31, 2012, included in accounts payable are as follows:

		March 31, 2013	December 31, 2012
Accounts payable short-term:			
Banco Nacional de México, S.A. [1]	Ps	432,617	434,693
Neoris de México, S.A. de C.V. [2]		449	-
Instalaciones y Desconexiones Especializadas, S.A. de C.V. [2]		354	991
GEN Industrial, S.A. de C.V. [2]		148	73
Total	Ps	433,568	435,757
Accounts payable long-term:			
Banco Nacional de México, S.A. [1]	Ps	33,900	33,900

[1] Derived from transactions related to master services agreement signed between the Company and Banamex in November 2006. Under this contract, the Company provides telecommunications services (including, local, long distance and other services) to Banamex and its affiliates located in Mexico.

[2] Mainly rents and other administrative services.

(9) Stockholders' equity

As of December 31, 2012, the common stock of the Company is Ps 6,625,536. The Company has 8,769,353,223 shares issued and outstanding. Company's shares are divided in two Series: Series A and B; both Series have two type of classes, Class "I" and Class "II", with no par value. Of the total shares, 96,636,627 are series A and 8,672,716,596 series B. At December 31, 2012 the Company has issued only Class "I".

In connection with the issuance of the convertible bond into shares held on January 31, 2013, and in accordance with the resolutions adopted by the Extraordinary General Meeting of Shareholders on January 25, 2013, the Company issued 972,814,143 Series B shares Class "I" that will be kept in the treasury of the Company, to be subsequently subscribed by the conversion of convertible bonds. To the extent that such shares be subscribed in the terms indicated will be considered subscribed and paid.

(10) Commitments and contingencies

As of December 31, 2012, the Company has the following commitments and contingencies:

(a) Interconnection Disagreements – Mobile Carriers – Years 2005 to 2007. On the second quarter of the year 2007, and the first quarter of the year 2008, the Federal Telecommunications Commission (*Comisión Federal de Telecomunicaciones*) ("**Cofetel**") ruled interconnection disagreements between the Company and the following mobile carriers: Radiomovil Dipsa, S.A. de C.V. ("**Telcel**"), Iusacell PCS, S.A. de C.V. and others ("**Grupo Iusacell**"), Pegaso PCS, S.A. de C.V. and others ("**Grupo Telefonica**") and Operadora Unefon, S.A. de C.V. ("**Unefon**").

With respect to Telcel, when the Cofetel issued the ruling where it determined the interconnection tariffs for the years 2005 to 2007, both Telcel and Axtel challenged such ruling via amparo trial, such trial being attracted by the Supreme Court of Justice (*Suprema Corte de Justicia de la Nación)* ("**SCJN**"). The SCJN decided, in public sessions that took place on February 25, 26 and 28 of the year 2013, to deny the amparo trials filed by the Company and Telcel, and therefore confirming the ruling issued in the past by Cofetel. The result of this amparo trial, do not creates an economic contingency for the Company due to the fact that during the years 2005, 2006 and 2007, the Company paid the interconnection tariffs set forth by the Cofetel in the above mentioned disagreements.

With respect to Grupo Iusacell, Grupo Telefonica and Unefon, the Company filed an administrative review proceeding, wich was resolved on September 1, 2008 by the Department of Communications and Transportation (*Secretaría de Comunicaciones y Transportes*) ("**SCT**"). The SCT decided to revoke the resolutions issued by the Cofetel, and established cost based tariffs for the years 2006 and 2007.

The above mentioned mobile carriers challenged the resolutions issued by the SCT via amparo trial, and on February, 2012, the SCJN ruled that the SCT had to standing to decide on the administrative review proceedings filed by Axtel, and that the Cofetel is the authority that should rule on these administrative review proceedings.

Therefore, during the following months, the Cofetel will have to decide yet again, the interconnection tariffs applicable between Axtel and the mobile carriers mentioned in the precedent paragraphs, and consequently, the interconnection tariffs that Axtel shall pay to these carriers is not yet definitely defined, due to the fact that these new rulings might be, once again, challenged by the parties involved.

(b) Interconnection Disagreements – Mobile Carriers – Years 2005 to 2007. With respect to Telcel, the Company filed an interconnection disagreement early on the year 2008, such proceeding being decided in fist instance by the SCT, on the first day of September, 2008, which as mentioned before, arose from a proceeding filed by Axtel. In such ruling, the SCT set the cost based interconnection tariffs of $0.5465 pesos, $0.5060 pesos, $0.4705 and $0.4179 pesos for the years 2008, 2009, 2010 and 2011, respectively.

Telcel challenged the resolution issued by the SCT via amparo trial, and on February, 2012, the SCJN ruled that the SCT had to standing to decide on the administrative review proceeding filed by Axtel, and that the Cofetel is the authority that should determine such interconnection tariffs

Due to the above mentioned SCJN ruling, the Cofetel will have to set forth the interconnection tariffs applicable between Axtel and Telcel, and consequently, the interconnection tariffs are not yet definitely defined, due to the fact that these new rulings might be, once again, challenged by the parties involved.

With respect to Grupo Telefonica, the Cofetel determined on October 20th, 2010, the interconnection tariffs for Axtel and Grupo Telefonica applicable to the period between 2008 and 2011, which consider the same amounts set forth by the SCT in the ruling issued on September 1, 2008, that is, $0.5465 pesos per real minute for 2008, $0.5060 pesos for 2009, $0.4705 pesos for 2010, and $0.4179 pesos for 2011.

This ruling was challenged via amparo trial by Grupo Telefonica, and its currently on its first stage. Final ruling on this matter is expected on the first semester of the year 2014.

With respect to Grupo Iusacell and Unefon, the Cofetel determined the interconnection tariffs for the years of 2008 to 2010, on the second quarter of the year 2009, such determination being challenged by the Company via an administrative review proceeding, wich is in the process of being solved by the Cofetel. As a result, the interconnection tariffs are not yet definitely defined, due to the fact that these new rulings might be, once again, challenged by the parties involved.

As a consequence of the rulings issued by the SCT on September 2008, the Company recognized since August 2008, the interconnection tariff of: $0.5465 pesos, $0.5060 pesos, $0.4705 y $0.4179 per real minute for Telcel, and of $0.6032 pesos for the other mobile carriers.

The tariffs that the Company was paying prior to the rulings, was of $1.3216 pesos per real minute to Telcel, and $1.21 pesos per rounded minute to the other mobile carriers. As of March 31, 2013, the difference between the amounts paid by the Company according to these tariffs, and the amounts billed by the mobile carriers, amounted to approximately Ps. 2,092 million not including value added tax.

After evaluating the actual status of the foregoing proceedings, and taking into consideration the information available and the information provided by the legal advisors, the Company's Management consider that there are enough elements to maintain the actual accounting treatment, and that at the end of the legal proceedings, the interests of the Company will prevail.

(c) Interconnection Disagreements – Telmex – Years 2009 to 2010. In March 2009, the Cofetel resolved an interconnection disagreement proceeding existing between the Company (Axtel) and Teléfonos de México, S.A.B. de C.V. ("Telmex") related to the rates for the termination of long distance calls from the Company to Telmex with respect to year 2009. In such administrative resolution, the Cofetel approved a reduction in the rates for termination of long distance calls applicable to those cities where Telmex does not have interconnection access points. These rates were reduced from Ps. 0.75 per minute to US$0.0105 or US$0.0080 per minute (depending on the place where the Company delivers the long distance call).

Until June 2010, Telmex billed the Company for the termination of long distance calls applying the rates that were applicable prior to the resolutions mentioned above, and after such date, Telmex has billed the resultant amounts, applying the new interconnection rates. As of March 31, 2013, the difference between the amounts paid by the Company to Telmex according to the new rates, and the amounts billed by Telmex, amount to approximately to Ps. 1,240 million, not including value added tax.

Telmex filed for the annulment of the proceeding with the Federal Court of Tax and Administrative Justice (*Tribunal Federal de Justicia Fiscal y Administrativa*) requesting the annulment of Cofetel's administrative resolution. The Company (Axtel and Avantel) have a contingency in case that the Federal Tax and Administrative Court rules against the Company, and as a result, establishes rates different to those set forth by Cofetel. Telmex obtained a suspension for the application of the interconnection rates established by Cofetel, such suspension came into effect on January 26, 2010, but ceased to be in force and effect as of February 11, 2010, since the Company decided to exercise its right to leave without effect the suspension by guaranteeing any damages that could be caused to Telmex. Nonetheless, the above mentioned Court revoked the guarantee given to Telmex, taking into consideration the issuance of resolution P/140410/189, whereby Cofetel ruled the same low rates between Axtel and Telmex for the year 2010.

In January 2010, the Cofetel resolved an interconnection disagreement proceeding existing between the Company (Avantel) and Telmex related to the rates for the termination of long distance calls from the Company to Telmex with respect to year 2009. In such administrative resolution, the Cofetel approved a reduction in the rates for termination of long distance calls applicable to those cities where Telmex does not have interconnection access points. These rates were reduced from Ps. 0.75 per minute to US$0.0126, US$0.0105 or US$0.0080 per minute, depending on the place where the Company delivers the long distance call. Based on this resolution, the Company paid approximately Ps. 20 million in excess. Telmex challenged the resolution before the Federal Court of Tax and Administrative Justice, and such proceeding is in an initial stage.

On May 2011, the Cofetel issued a ruling resolving an interconnection disagreement proceeding between Telmex and the Company, related to the tariff applicable to the termination of long distance calls from the Company to Telmex, for the year 2011. In such administrative resolution, the Cofetel approved a reduction of the tariffs applicable for the termination of long distance calls. The above mentioned tariffs were reduced from US$0.0126, US$0.0105 or US$0.0080 per minute, to Ps.0.04530 and Ps.0.03951 per minute, depending on the place in which the Company is to deliver the long distance traffic. Telmex challenged this ruling before the SCT, but the request was dismissed by such authority. Nowadays, Telmex challenged such dismissal, before the Federal Court of Tax and Administrative Justice, and such proceeding is in an initial stage.

As of March 31, 2013, the Company believes that the rates determined by the Cofetel in its resolutions will prevail, and therefore it has recognized the cost, based on the rates approved by Cofetel.

As of December 31, 2009, there was a letter of credit for U.S. $34 million issued by Banamex in favor of Telmex for the purpose of guaranteeing the Company's obligations, which were acquired through several interconnection agreements. The amounts under the letter of credit were drawn by Telmex in the month of January 2010, claiming that Avantel had debts with such company. As of March 31, 2013, Avantel has been able to recover Ps. 418 million of pesos from the amount mentioned above, through compensation with regard to certain charges for services rendered by Telmex to Avantel on a monthly basis. The remaining balance of Ps. 2 million of pesos is recognized in the "other accounts receivable" line item in the balance sheet.

(d) The Company is involved in a number of lawsuits and claims arising in the normal course of business. It is expected that the final outcome of these matters will not have significant adverse effects on the Company's financial position and results of operations.

Axtel, S.A.B. de C.V. reports their operations with financial derivative instruments, complementary to the 1st Quarter Financial Information Report:

Qualitative and Quantitative Information:

Derivatives Policy

Axtel, S.A.B. de C.V. (" The Company or Axtel ")'s internal policy is to contract derivative instruments to mitigate primarily exchange and interest rate risk exposure with respect to our foreign currency obligations or commitments contracted in currencies different than the Mexican peso.

The strategy of the Company depends on the particular risk to be hedged, in accordance to the established policy. We prefer instruments that comply with IFRS of the International Financial Information Rules as hedge instruments, although other instruments can be considered also as long as such instruments reduce Axtel's risks against its foreign currency exposure. Once defined the type of financial instrument to be used, the Company deals with international counterparties on the Over the Counter market ("OTC"). The Counterparty must have investment grade by the major rating agencies or met Axtel's internal Treasury policies. The Company requests at least two quotes from counterparties. These are compared and analyzed under the parameters of the Financial Information Standard (IFRS), and then the most competitive is selected. All the operations must be authorized by the Finance, Treasury and Investor Relations Director.

The valuation agents are established in the contract of financial derivative instruments or International Swap Derivatives Association, ("ISDA") and their schedules. These documents contain the terms and conditions and the required documentation for each transaction, such as: payment dates, calculation agent, defaults, currency of delivery, margin calls and applicable legislation among others. In order to determine the mark to market on a specific date, the Company realizes their own valuations extracting economic information from specialized sources such as Reuters, Bloomberg, Banxico's web page, and other financial institutions.

During the 1st quarter 2013 no hedge transactions were traded by the company, however, the two operations at the end of the Fourth Quarter of 2013 were canceled so at the end of the first quarter of 2013 the company has no operations of derivative financial instruments outstanding.

Margin calls, collateral and credit lines.

Margins calls and collaterals are established also in the ISDA agreement. These are established by the counterparties depending on the authorized credit lines and determined threshold limits. The Company does not operate with counterparties that do not offer reasonable lines relative to the size of the transaction closed. A transaction is not negotiated with a counterparty that does not offer a sufficient line related to that specific hedge.

Levels of authorization

The authorized officers to close derivative transactions are the Finance, Treasury and Investor Relations Director, with approval of the Chief Financial Officer. Depending on the notional amount of each transaction, the internal Treasury committee is informed and subsequently approves certain transactions, according to Axtel's internal Treasury policies. The procedure of every operation is realized with two or more quotes which are shown by the Finance, Treasury and Investor Relations Director to the Chief Financial Officer who decides to proceed or not with such operation.

Procedures of internal control

Once the transaction is closed the counterparty sends a confirmation which specifies the terms and conditions of the deal to the Company. The Company´s Treasury department ("Treasury") reviews it and sends it to the Accounting department for its proper registration.

In order to keep control over each transaction, on a monthly basis, Treasury executes valuations to determine the mark to market and the effectiveness of the derivative instruments. These valuations are performed with tests established in the IFRS. Once these valuations are made, the information is passed along to the Accounting department for proper registration in the books. On a quarterly basis, our external auditors review the above mentioned records applying their own valuation and calculation methods.

External Review

KPMG Cardenas Dosal, S.C., the Company´s external auditors, reviews periodically the valuation and accounting records of these operations.

Valuation Techniques

The valuation of derivative instruments with hedging purposes is realized using its fair value method.

It should be noted that because such assessments are made above according to international standards IFRS, the market value registered by the company include counterparty risk, for that reason and in case the market value is in favor of Axtel (asset) this includes the CDS (Credit Default Swap)of the counterparty, and if the market value is in favor of the counterparty (liability) the record includes counterparty risk in the record Axtel (Z-spread).

With the purpose of monitoring the effectiveness of derivatives with hedging purposes, prospective (analysis of linear regression) and retrospectives (periodic or accumulated compensation) tests are realized using statistical samples of market variables (interest and exchange rates), in accordance to the IFRS. This technique allows the monitoring of the derivative instruments' performance and the likelihood that a particular derivative instrument could not be treated as a hedge instrument in the future.

Axtel prepares its own valuations, which is compared against the counterparty's valuation. If there is a significant difference, further clarification is requested.

In order to determine the effectiveness of the hedging, the method of periodic compensation is used.

At least once a year, the external auditors of the Company (KPMG Cardenas Dosal, S.C) review the derivative instruments accounting records and validate their effectiveness in accordance with the IFRS.

Sources of Liquidity.

Most of company's revenues are pesos denominated. With the purpose of eliminating the risk associated of having revenues in Pesos and interest payment obligations in Dollars associated with the Senior Notes (see "Debt Profile"), the Company entered into "Interest Only Swaps" and FX Forwards, whereby, the Company effectively locks the above mentioned interest payments into Pesos, met with the cash flow generated by its operation.

The Company does not currently have lines of credit for this type of instruments.

Changes in the risk exposure

The risks that are identified are the decrease of the exchange rate for all the derivative instruments.

Quantitative Information (figures expressed in thousands except that another reference is indicated).

As of March 31, 2013, the Company had no derivative instruments contracted:

HedgeType	Notional amount		Fair value		Credit line (USD)
			Actual Quarter	Past Quarter	
1	SWAP	464,368	0	(40,299)	0
2	SWAP	128,250	0	(6,233)	0

Sensibility analysis:

No sensibility tests were performed due to there are no derivative financial instruments operations at the end of the First Quarter of 2013.

Presentation of the Financial statements:

Asset account"Derivative Instruments" (Mark to Market): $0 (see line 11060020 of the Balance Sheet).

Liability account"Derivative Instruments" (Mark to Market): $0 (see line 21060020 of the Balance Sheet).

Equity account “Accumulated Effect by Valuation of Derivative Instruments": $0 (see line 30090050 of the Balance Sheet).

Credit to the Comprehensive Financial Result for "Variation of the Fair Value of Derivative Financial Instruments": $25,523 (see line 40080050 of the Income Statements).
